Why do not you invest five minutes and also spend little money to obtain guide **America: Who Really Pays The Taxes? By Donald L. Barlett** here? Never ever let the extra point goes away from you.

From Publishers Weekly

For readers who have ever had the sneaking suspicion that they're being shafted, the latest book from this Pulitzer Prize-winning investigative team (**America: What Went Wrong?**) provides the facts, figures, names and anecdotes to prove it. Their goal is to show how all those abstract terms bandied about on the Sunday morning talk shows affect the average taxpayer, particularly anyone whose family income is between, say, \$25,000 and \$150,000. Wealthy individuals squirrel away money through tax-free bonds, charitable-donations deductions and racehorses, among other write-offs; and the wealthiest corporations benefit from foreign tax credits, deductions for estimated worth of brand names and even the writing-off of interest on loans taken out to pay their stockholders (Weren't stockholders supposed to share both profits and losses?). All of which, the authors note with jackhammer regularity, leaves Joe and Jane Shmoe holding the tab. The authors are bipartisan in their apportionment of blame, rounding up not only the usual Republican presidential suspects but also Democrats like LBJ (whose "unified budget" amounted to a grand-scale doctoring of the books), Dan Rostenkowski (superannuated Chairman of the House Ways and Means Committee) and even independent Ross Perot (whose tax-free income in 1991 was somewhere between \$18 and \$87 million). Their "modest proposal" on reforming the tax system is indeed that: one based largely on eliminating deductions and making all income--no matter how earned--equally taxable. Barlett and Steele's greatest achievement, though, is to have painstakingly translated mountains of often deliberately obscure material, thereby making their book a dream for those who've never quite grasped what government, corporations and the wealthiest few are doing--and a nightmare for those who have and want to keep that knowledge to themselves.

From Booklist

"Us middle-class schlemiels, that's who!" But that answer to the title's question is not all that informative, so Barlett and Steele, tax reporters for 25 years and authors of the 1992 bestseller, **America: What Went Wrong?**, tell us who doesn't pay and how they don't. Two systems of taxation have developed in the U.S. since the 1950s, they say, one for wealthy individuals and corporations, the other for everybody else. In the six subsequent chapters, they prove two-tiered taxation's a fact by discussing one rich stiff's tax dodge after another, from preferential capital gains rates to multinational corporate transfer-pricing to the tax court

system, and they demonstrate that to those responsible for tax law (guys named Rostenkowski, Dole, Gephardt, etc.) money doesn't talk, it orders. After all the dismaying federal news, Barlett and Steele tell us about "The Unfairest Taxes of All": local and state government levies (on real estate, sales, income, etc.), which, driven by federal mandates upon states and municipalities, have risen faster and more inequitably than federal taxes. Barlett and Steele maintain fair taxation is a real possibility, and they make a serious "Modest Proposal" for reform that eventually, but hardly exclusively, does indeed depend upon real modesty, i.e., spending cuts. But popular political shoving will be necessary to achieve tax fairness. Superb investigative journalism. Ray Olson

It will certainly include more expertise of you to life and work much better. *America: Who Really Pays The Taxes? By Donald L. Barlett*, Try it and verify it.

AMERICA: WHO REALLY PAYS THE TAXES? BY DONALD L. BARLETT PDF

American: Who Really Pays the Taxes? is a disturbing, eye-opening look at a tax system gone out of control. Originally designed to spread the cost of government fairly, our tax code has turned into a gold mine of loopholes and giveaways manipulated by the influential and wealthy for their own benefit.

If you feel as if the tax laws are rigged against the average taxpayer, you're right:

- Middle-income taxpayers pick up a growing share of the nation's tax bill, while our most profitable corporations pay little or nothing.
- Your tax status is effected more by how many lawyers and lobbyists you can afford than by your resources or needs.
- Our best-known and most successful companies pay more taxes to foreign governments than to our own.
- Cities and states start bidding wars to attract business through tax breaks -- taxes made up for by the American taxpayer.

Who really pays the taxes? Barlett and Stelle, authors of the best-selling america: What Went Wrong?, offer a graphic expose of what's wrong with our tax system, how it got that way, and how to fix it.

a little dated but still extremely informative and timely

By J. Colbert

Thanks to Occupy Wall Street and the near total collapse of the world financial system in 2007-9 people are talking about the problem of growing economic inequality. You can not find better information on how America's economic system has been rigged than there is found in the series of books by prize winning investigative authors Donald L. Barlett and James B. Steele.

I have been a fan of these guys since their series of articles, "America, What Went Wrong?", first published in the Philadelphia Inquirer over 20 years ago.

In honor of their latest book, "The Betrayal of the American Dream", an update of their familiar themes, I ordered copies of all their earlier books and read or re-read them in sequence. I'm currently half way through the new book, but this book is still one of my favorites, despite being a little dated [1994].

After reading this book I ordered several more copies to loan to friends.

Do any of the following phrases and ideas sound familiar to you?

"tax reform" [usually said when Republicans and Democrats are cutting taxes for the very richest

Americans].

"class warfare" [even thinking about letting even a temporary tax cut benefitting mostly the super rich to expire].

"taxation [is] socialism" or "a club to punish success".

[lower tax rates increase government revenue]

[tax cuts will generate more jobs for the poor/working class]

[unless rates are lowered rich people will "avoid" taxes]

AMERICA: WHO REALLY PAYS THE TAXES? BY DONALD L. BARLETT PDF
