Not reading the book is the fifth mistake!

By Crispix

This short book is a nice start to what looks to be a very promising addition to poker training. These four chapters are indeed important topics for anyone wondering why they are losing money at the poker table. The first two "mistakes" were merely confirmation of concepts I already know and use, but are nonetheless very important and explained very well. And Rob's right: I see people losing lots of money making those specific mistakes. Mistake #3 approaches a common topic from an entirely new angle, and there are some choice ideas in there that are worth remembering. Mistake #4 was an enigma: at first I thought it was a bit boring -- as if Rob put some filler in the book. The more I think about it, though, this chapter is the best of the bunch, at least for me, because it talks about losing money by not maximizing your hand in different situations. I don't want to give away much more since I encourage you buy the chapters -- if you win one extra BB from reading it, it will have paid for itself. I look forward to more. Thanks, Rob!
