Shakespeare's working life, from about 1590 to 1615, was not only a period of rich activity on the London stage, but also one of prolific writing and publishing about food. Shakespeare himself used food in many of his plays: from memorable banquet scenes, to the use of food and feasting as metaphor. This fascinating book explores the plays alongside contemporary recipes to offer modern day cooks a unique insight into daily life and gastronomy in Shakespeare's London.

Worth every penny & then some

By Neill Bell

This does seem to be a very carefully research tome. The original recipes are here but, to make it easier for the modern cook, they are written out again with modern ingredients & of course, weights & measures. Having grown up in the UK, there are many foods that take me back to meals cooked on an old Raburn from basic, readily available food stuff. I am afraid, there are a couple of words I do not agree totally with (Sippits, for one), but on the whole, this is well researched & a cut above so many books of this ilk. There has been a real attempt to use only vouch-safe sources & of course, quote the sources within the body of the text. In short, this is a magnificent, well presented book which has not fallen into the trap of substituting erroneous items. There is clear learning here & a number of the recipes are going to be made. Even some with this books take on sippits! I am glad I found this publication; it is going to be well used.
